Special issue

RATIONALES, PERFORMANCE AND GOVERNANCE OF PUBLIC ENTERPRISES

*Edited by Luc Bernier (Enap – Québec), Massimo Florio (University of Milan)
and Johan Willner (Åbo Akademi University School of Business and Economics).*

[Economia Pubblica](#) (the Italian Journal of Public Economics), in collaboration with the [CIRIEC](#) International Scientific Commission Public Services/Public Enterprises and the Jean Monnet [EUUsers Network](#), invites submission to a special issue on the following topic: "**Rationales, performance and governance of public enterprises**".

Governments, both at national and sub-national level still own enterprises in such sectors as energy, transport, telecoms, finance, high-tech, and others. In some countries the reform of the remaining State Owned Enterprises (SOEs) has followed the privatization of others. In many cases governments have preferred to maintain a controlling or influential stake in partially privatized enterprises.

Economia Pubblica is interested to high quality papers dealing with, for example:

- *country studies of major SOEs*
- *international dimensions of public enterprises*
- *privatization versus reform of public providers of services*
- *empirical studies of performance compared between private privatized and government-owned enterprise*
- *theoretical analysis of SOE in contexts such as regulated or unregulated mixed oligopoly*
- *governance mechanisms*

❖ **Project milestones and deadlines for submitting the proposal**

- Submission is now open and the final deadline is **January 10th 2016**.
- Each paper will be sent to the anonymous reviewers after preliminary screening by the Editors.
